**SISCRA**

*not just a craft*

Siscra Open UTM-X1001-ID Software

**Multiple security solutions within one single system :**

## Firewall

Firewall is a network security system that monitors and controls the incoming and outgoing network traffic based on predetermined security rules.

## Intrusion detection / prevention (IDS/IPS)

An intrusion detection system (IDS) monitors network or systems for malicious activity or policy violations.

## Gateway antivirus (AV)

Gateway Anti-Virus allows applications across the enterprise to check files for viruses by providing a SOAP-based virus scanning web service.

## Gateway anti-spam

Protect mail server against spam, viruses and malware with Siscra for businesses, government, education and non-profit organizations.

## Content filtering

Customized system configuration to prevent access to certain items, which may be harmful if opened or accessed.

## Hardware Specification :

- Dual CPU Rack
- 2x Intel® Xeon® Processor E5-2620 v4 (8 Cores, 2.10 GHz, 20M Cache)
- Chipset Intel C612
- Memory 2 x 16GB RDIMM DDR4 PC4-19200
- Video Matrox G200eR2 with 16 MB
- 12Gb/s SAS Controller
- 1 x 300GB SAS 10K RPM 2.5 Inch SFF Hot Plug
- 2.5 Inch SAS SFF Hot Swap Standard Bays
- USB 3.0  USB 2.0 DB-15 video ports
